## **DETAILED ACTION**

### ***Specification***

The abstract of the disclosure is objected to because of the following:

In the Specification, paragraph [0031], in line 2, "20 25" should be "20-25", and in line 5, "2 4" should be "2-4";

### ***Claim Objections***

Claims 1, 20 and 22 are objected to because of the following informalities:

in claim 1, in line 5, "means" after catheter should be deleted;

in claim 20, in line 3, "a pumping" should be "a pump";

in claim 22, in line 4, after "temperature" the word "of" should be inserted;

Correction is required.

### ***Election/Restrictions***

Newly submitted claim 38 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the structure is significantly different (Figure 6) than that originally claimed (Figure 2).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 38 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Allowable Subject Matter***

Claims 1-2, 4-13, 19-23 and 25-37 would be allowed after the corrections above.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cioanta et al. (6,758,857) disclose a treatment balloon catheter which alternatively can be adapted to treat the nose, but fails to disclose two balloon catheters for such treatment.
